DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks (pages 5-7), filed 7/3/2007, with respect to claims 1-10 have been fully considered and are persuasive. The rejection of claims 1-10 has been withdrawn.

Allowable Subject Matter

2. Claims 1-10 are allowed.
3. The following is an examiner's statement of reasons for allowance:

* Independent claim 1 has been amended to overcome the rejections under 35 U.S.C. 102(e) and 35 U.S.C. 101;

* The present invention provides a new method of processing red eyes in digital images that can be adapted to various situations and obtain high precision in the localization of red eyes to automatically eliminate the red eye effects without user intervention (specification, page 2, lines 15-19).

Particularly, the new method comprises the following features, which the prior art taken either singly or in combination does not teach:

- detecting one boundary within the skin color area that matches with an eyelid quadratic curve to determine eyelid area; filling up the detected red color pixels with a predetermined color, thereby eliminating the red eye in the image (see independent claim 1).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
